#### How to Stop Two-Side Printing From Being the Default in macOS

1. Enable the CUPS in the browser.

CUPS is a network printing service used by Mac computers. It allows you to setup your printers on a network, and customise options such as tray setup.

- Go to http://localhost:631/printers/.
- A screen will appear saying 'Web Interface is Disabled'

← → C' [] localhost:631/printers/

#### Web Interface is Disabled

The web interface is currently disabled. Run "cupsctl WebInterface=yes" to enable it.

- Start enabling it by opening 'Terminal' program.

- Select and copy this command **'cupsctl WebInterface=yes'** in Terminal and hit enter.

- After that, visit again this url <u>http://localhost:631/printers/</u> and enter your MAC computer username and password.

#### Sign in
